

A) Features

The RFL-3 fluorescent ring light possesses unique appearance and special light effect. The three fluorescent tubes create only little heat, which is suitable for taking close-up shots and portrait.

The lamp body employs thermo stable and flame-resistant materials which guarantee a secure usage. The light effect achieves stably without shadows, constant color temperature, high Color Rendering Index (CRI), and incredibly long service life.

B) Accessories

Diffuser

Camera Bracket

Tilting Bracket
CLD-15
