Falcon Eyes Limited**

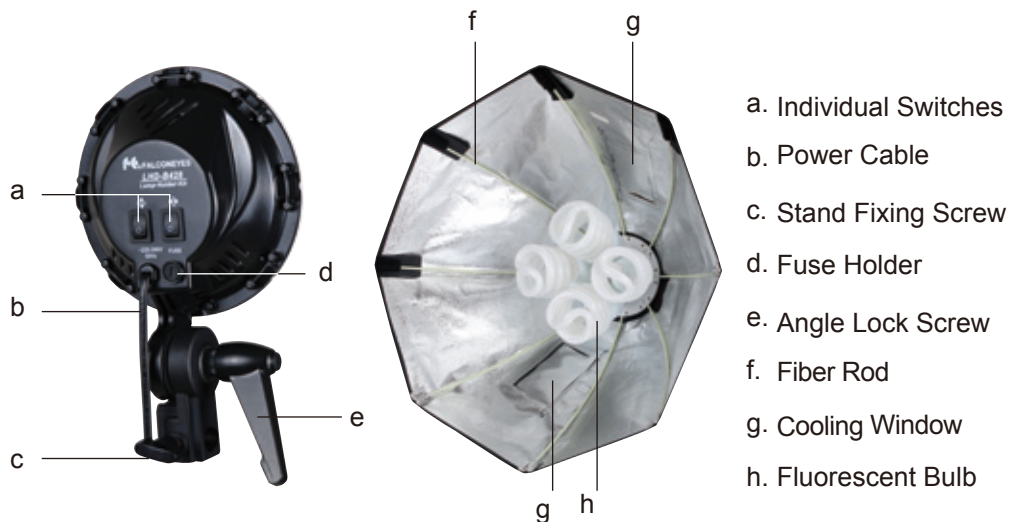

A) Features

LHD-B455 series utilizes four pieces of spiral fluorescent bulbs to illuminate the area with powerful cool light but in quiet.

With the cool lighting, photographers can work in a more comfortable environment; the light can be put near the shooting object without damaging it.

It provides perfect projection angle to cover a studio. It is designed with 2 power switches to control the light output. A softbox is included for softening the light.

B) Major Parts

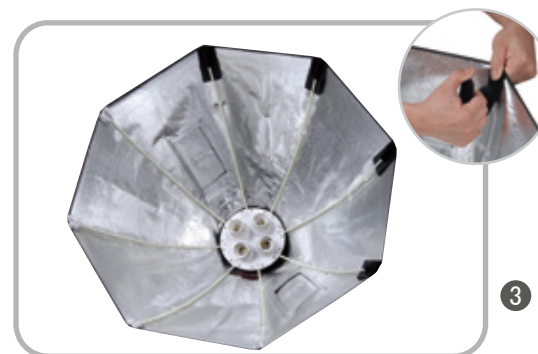

C) Instructions

- 1 First, place the lamp holder and the power cord through the hole in the middle of the softbox, and then insert the eight fiber rods into the holes of the lamp holder.

- 2 Insert the rods into the four flexible holders of the soft box, and then insert the rest of the rods to the other holders of the soft box.

- 3 Using the velcro to tighten the soft box when all the rods are well inserted.

- 4 Install with the light bulbs as well as the diffuser.
